* The USDA published new rules concerning Scrapie in sheep and goats in August of 2001. These rules include identification and record keeping requirements that call for farm or "premise" identification to their "flock of birth." 4-H project members will need to be sure that their animals are correctly identified. Information about official identification can be obtained from the Division of Animal Industry, practicing veterinarians, and at www.animalagriculture.org/scrapie or www.aphis.usda.gov/vs/scrapie.htm.
